

PORTER CREEK VINEYARDS

Technical Data Sheet: 2014 Carignane, Old Vine, Mendocino County

Year planted: 1939

Farming type: CCOF Organic, dry farmed, head pruned

Harvest date: September 21, 2014

Harvest Analysis: 22.0 Brix, Total Acidity 5.4, pH #.41

Final alcohol: 13.0%

Wine making: Open top fermentation, natural yeast, small French oak barrels 20% new oak

Cases produced: 721

Description:

Carignane is a red varietal that was widely planted in California during the late 1800's though the mid- 1900's, mostly by Italian immigrants, and some of the old vineyards are still producing.

Ours comes from a vineyard planted in 1939, and yields a wine that is remarkably rich and generous, yet supple and silky. There is a unique fruit profile of black currants, plums and spice.
