# Glazmataz protects precious wine glasses.

Handling and storage

Carrying

Washing

Product name: Glazmataz (patent pending) / Made in Japan / Material: Polypropylene / Heat resistance: 100°C

The enjoyment of wine changes with a good glass, but a good glass is easy to break. Resolving this problem inspired an innovative new rack to protect precious wine glasses. Designed, developed and made in Japan, the light and strong Glazmataz rack keeps wine glasses safe and secure. It dramatically reduces glass breakages, not only when handling and storing glasses, but also while carrying and washing them. Add joy and peace of mind to wine life with Glazmataz.

## 1. The secret behind Glazmataz is the shaped bottom.

Most wine glass breakage occurs when glasses fall over during washing or come in contact with other glasses or dishes. The custom shape and material of the elastic bottom in Glazmataz helps protect wine glasses from damaging shocks, while the rack ensures they are always upright. Even if you drop a wine glass into the Glazmataz at an angle, it's not a problem.

## 2. Connect Glazmataz units into your preferred format!

Glazmataz units of the same size can be connected on the front, back, and both sides to make larger racks for storing more glasses. In work areas with limited space, you can quickly split and connect them to suit the current need, combining them in a variety of ways to fit available space and corners. You can also stack them.

## 3. Put them in the dishwasher as is!

With Glazmataz, cleaning glasses is quick and easy. After hand washing, put them in upside down and leave to dry. When washing and cleaning many glasses, Glazmataz racks can be connected to create a tray that goes straight into the dishwasher. Wine glasses can be washed without setting special settings in most domestic and international commercial dishwashers.
