WINEMAKING

Winemaking note

I made this wine from a blend of fruit grown in our vineyards along the Murray River. Following delivery and crushing of the grapes during the cool of the night, the Sauvignon Blanc juice was cold settled and racked. An aromatic yeast was used for inoculation and this parcel was cool fermented for 14 days. The resulting wine is fresh and vibrant showing lovely tropical fruit flavours with a hint of typical herbaceous Sauvignon Blanc characters.

Varietal composition 100% Sauvignon Blanc

Alcohol 12%
