

FELTON ROAD

2024 Felton Road Chardonnay *Block 2*

Tasting Note

Over 30 years on the free draining schist of Block 2, these vines have developed a Spartan sense of resilience. Limpid and fresh in the glass, initial notes of elderflower and chamomile lend a sense of finesse that belies the latent power of the palate. Block 2 is, as ever, clear, uncompromising and linear. A taut line of acidity streaks across a palate awash with Meyer lemon and grapefruit rind, leading to a refreshing mineral finish. Chiselled, vibrant, crystalline. A wine that could come from nowhere else.

Introduction

Commencing with meticulous site selection and vineyard design in 1991, Felton Road's story is one of refusal to compromise. A strict 100% estate policy with fully organic and biodynamic viticulture (BioGro and Demeter certified) ensures that our fruit arrives at the winery as pure as it can be, while our entire estate comes as close to true sustainability as is possible. A commitment to hands off winemaking: gravity flow, indigenous yeasts and malolactic, an avoidance of fining and filtration all help preserve the wine's expression of its terroir. The result is Riesling, Chardonnay and Pinot Noir which accurately express the authenticity and complexity of our unique vineyards.

Vineyard & Viticulture

Felton Road farms four properties totaling 34 ha in the Bannockburn subregion of Central Otago. Block 2 was planted in 1992 and is positioned on a gentle east facing slope of deep angular schist gravel soils immediately north of Block 3 on The Elms vineyard. Meticulous summer management of a single vertical shoot positioned (VSP) canopy ensures even and early fruit maturity. Shoot thinning, shoot positioning, leaf plucking, bunch thinning and harvest are all carried out by hand to ensure optimum quality fruit. Cover crops are planted between rows to assist in vine balance and to improve soil health and general biodiversity.

Vintage

After a wet September, spring commenced with good soil moisture and bud burst occurred at the normal time of early October. Temperatures hovered around average with December being warm and dry, enabling a successful flowering and fruit set. The dry conditions prevailed throughout January and February limiting berry size and setting the scene for fruit with elevated phenolic material and complexity. Judicious use of irrigation was required to maintain sufficient vine health throughout this sustained dry period. Temperatures never spiked and hovered around average enabling a slow and steady path to maturity. A distinctive feature of March 2024 was the cool night temperatures preserving acidity, freshness and precision of fruit character. Chardonnay was harvested from 18-27 March.

Vinification

Mendoza clone Chardonnay from Block 2 was whole bunch pressed, settled overnight and flowed by gravity to barrel in the underground cellar. Fermentation with indigenous yeasts in seasoned French oak (only 4% new) was followed by a long and complete malolactic over the spring and summer. After 17 months in barrel (11 months on gross lees), the wine was carefully racked to tank for bottling in late-August, 2025. The wine was not fined or filtered.
